Acworth, Ga | +1 (470) 383-1136

## Summary

---

A growing front end software engineer with 4+ years experience working in agile environments to plan, design, and implement creative UI solutions to problems that range from simple to the complex. Experienced in designing customizable components to exceed client requests. Able to work effectively with product, teammates, and QA to contribute to the roll out of quality software throughout the entire development lifecycle. Able to analyze, debug, and fix issues that arise from testing. Known as a hard working engineer, but most importantly, eager to learn new skills to become better tomorrow than today. Please, feel free to visit GitHub to pull an independent project or two.

## Objective

---

To obtain a full time remote position with emphasis towards working with modern tools and frameworks. Primarily, focused on locating the right team; humble, driven, and focused on growth. With the right team in place, the right leadership, and a proven process; the team will always succeed.

## Education

---

**Bachelor of Science in Computer Science**  
Kennesaw State University Marietta, Ga
